Abstract

The development of marine and non-marine insurance principles dates back centuries. Whether for individuals or businesses, purchasing insurance coverage for potential risks is important before taking any chances. This course will introduce students to insurance and its significance for individuals and businesses. The course aims to teach how an insurance contract is formed, the insured and excluded risks, the consequences of breaching an insurance contract, various types of losses, how insurance indemnity is assessed, and the actors who play significant roles in the insurance lifecycle. By the end of the course, students should be able to expertly evaluate the terms of an insurance contract and comment on whether the relevant insurance policy covers the assured's claim.
